

ATIQA SAEED

Software Engineer | Full-Stack Development - Quality Assurance - UI/UX

Islamabad, Pakistan | +92 314 0052238 | atiquati5@gmail.com

ABOUT ME

BS Software Engineering graduate from National University of Modern Languages (NUML) with hands-on full-stack development experience and a growing focus on Quality Assurance. Built and shipped LocaleLink, a production-style MERN application with AI-integrated features, and currently developing QA skills in test case management and manual testing using Jira, Zephyr Scale, and Trello. Strong problem-solver with a detail-oriented, quality-first mindset, seeking opportunities as a Software Engineer / QA Engineer.

EDUCATION

Bachelor of Software Engineering — NUML, Islamabad

2022 – 2026 (Graduated)

Pre-Engineering — Quaid-e-Azam College of Modern Sciences

2020 – 2021

FEATURED PROJECT — LOCALELINK

Full-stack business directory & review platform connecting users with local businesses in Pakistan—final Year Project.

- **Full-stack build:** Developed the complete application using React/Vite (frontend), Node.js/Express (backend), and MongoDB (database).
- **AI-powered review analysis:** Integrated sentiment analysis on user reviews using LLM APIs (evaluated OpenRouter, Nvidia, and Gemini 1.5 Flash) to surface review insights.
- **AI chatbots:** Built business-specific chatbots trained on menu, reviews, and location data, plus a homepage assistant for business discovery.
- **Maps & location:** Integrated Google Maps and Google Places Autocomplete for business location search and display.
- **Platform features:** Implemented a reviewer badge system, business owner dashboard, review submission workflows, and API routing/middleware.

OTHER ACADEMIC PROJECTS

- **Employee Management System (C++):** Console-based application for managing employee records with full CRUD operations and file handling.
- **AWT GUI Development:** Built desktop GUI applications using Java AWT.
- **Simple Portfolio Website:** Responsive personal website built with HTML, CSS, and JavaScript.
- **Internships Tracker (.NET Framework):** Web/desktop application to manage and track internship applications and progress.
- **Smart Kitchen & Grocery Assistant (UI/UX):** Designed a modern, user-friendly website prototype in Figma.

TECHNICAL SKILLS

- **Programming & Development:** C++, HTML, CSS, JavaScript, Python, .NET Framework, React, Bootstrap, Node.js, Express
- **QA & Testing:** Jira (test case management), Zephyr Scale, Trello, Manual Testing, Test Case Design, Apache JMeter
- **Databases & Tools:** MongoDB / MongoDB Compass, MS Visio, MS Visual Studio
- **Design:** Figma, Canva, Adobe Express

ADDITIONAL INFORMATION

- Strong problem-solving and logical thinking abilities
- Quick learner with a hands-on approach to new technologies and testing tools
- Excellent command of English and Urdu (written & spoken)
